Technology for the Food Industry - International magazine in Italian/English

N°5 Maggio / May 2018

Poste Italiane SpA - Spedizione in Abbonamento Postale - D.L. 353/2003 (conv. in L. 27/02/2004 n. 46) art. 1 comma 1 NE/TV - Anno 23 N°05/2018 - ISSN 2498-9541

For more than 65 years we have been analyzing and studying the design requirements of conveying systems to make them efficient and functional for **ALL** innumerable kinds of products.

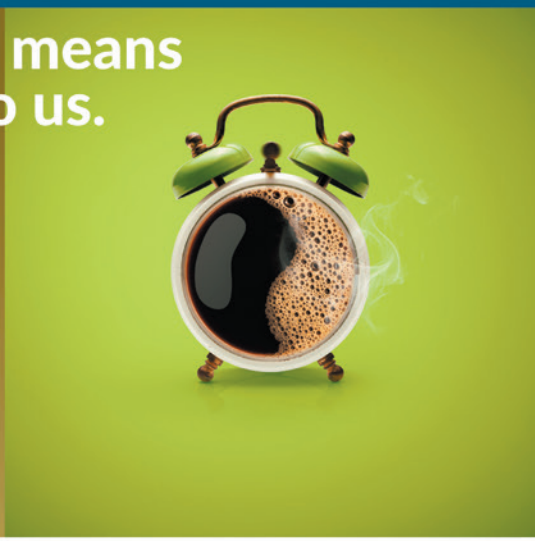

To develop our **range of products** we have taken so many factors and variables into account and we have implemented so many configuration alternatives that it is almost impossible not to find the **right solution**.

A new notion of customization to offer you **TAILOR-MADE** valves and make your **investment the most targeted and profitable**.

"TAILOR-MADE" means something new to us.

Mole diamantate di alta qualità

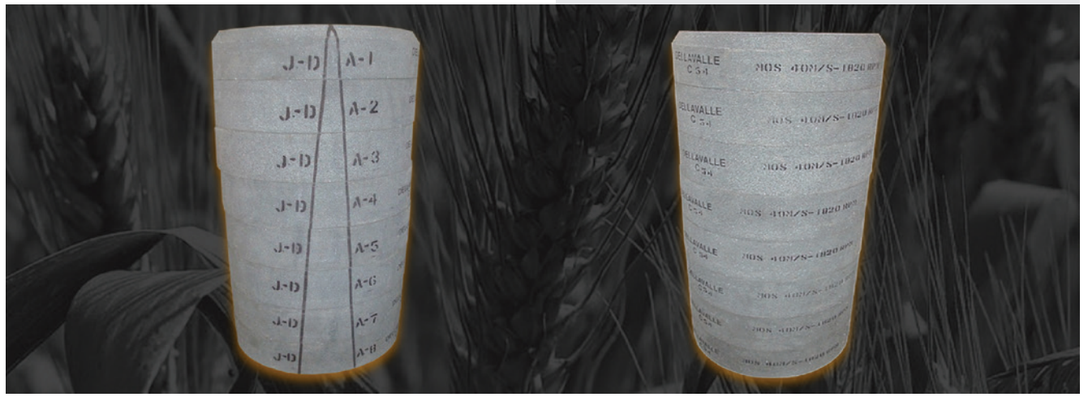

Grazie alla sua lunga esperienza nella trasformazione e lavorazione cereali, DELLAVALLE propone soluzioni innovative

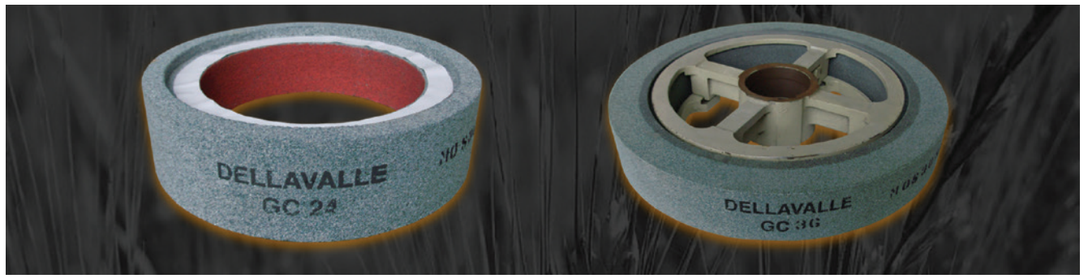

DELLAVALLE Srl da ormai più di 30 anni si occupa della trasformazione e lavorazione dei cereali. In questi anni un'attenzione particolare è stata dedicata al settore ricambi e in special modo alle mole abrasive (emery wheels) ed alle lamiere (screen) con una continua ricerca e sviluppo di materiali che allungano la vita utile delle parti di usura pur mantenendone inalterate le qualità di processo. In questo ambito DELLAVALLE Srl ha anche raccolto, assieme ad uno studio tecnico specializzato, una documentazione che le permette di fornire assieme ai ricambi una Certificazione di Alimentarietà degli stessi, fornendo così alle imprese un valido documento che viene sempre più richiesto dagli Enti Certificatori.
Grazie, inoltre, a notevoli investimenti, effettuati negli ultimi anni, DELLAVALLE Srl è in grado di evadere ordini di ricambi delle principali realtà del mercato direttamente da magazzino evitando così, nella maggioranza dei casi, le lunghe attese dei tempi di produzione.

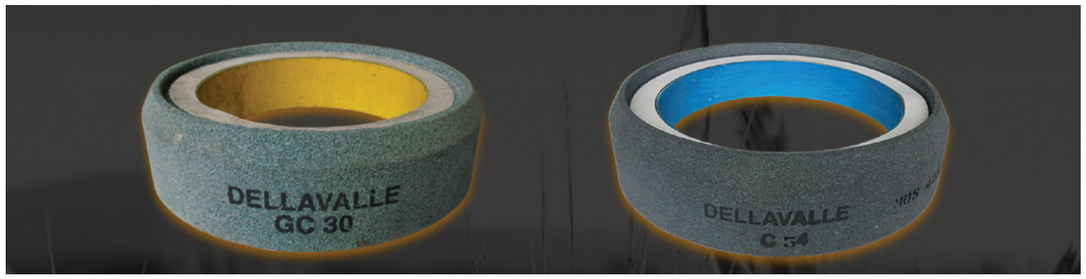

Top-quality diamond wheels

Thanks to its extensive experience in cereal processing, DELLAVALLE proposes innovative solutions

For more than 30 years, DELLAVALLE Srl has been active in the cereal processing sector. In those years, it has paid special attention to spare parts, especially emery wheels and screens, while carrying out continuous research and development in materials able to extend the life of the parts subject to wear and tear, while keeping the quality of the process unaltered.
To this regard, DELLA VALLE Srl, in cooperation with a specialized technical firm, has collected the necessary documents to supply, together with spare parts, also a Certification of Edibility, thus offering companies a valid document that is more often requested by Certification Bodies.
In addition to this, thanks to considerable investments made in the latest years and stock availability, today DELLAVALLE Srl can fulfil orders of spare parts of the major realities of the market, thus avoiding long lead time.
